Successfully Running

Economical **Ht. Hp. Long Top Tube** Soft Flow Dyeing Machine

Long top tube fabric dyeing machine is specially design for heavy delicate fabrics.

Technical Feature:

- Capacity: 300 Kg. & 400 Kg.
- Max. working temperature 140° C.
- Dye 30 to 450 gm/sq.mtr. fabrics (Woven & Knitted)
- Single vessel two chamber.
- Online vessel washing system.
- Filter design for easy cleanup even during the process.
- Vessel made from AISI SS 316 L highly corrosion resistance stainless steel.
- Fabric drive reel with A.C. motor & frequency controller.

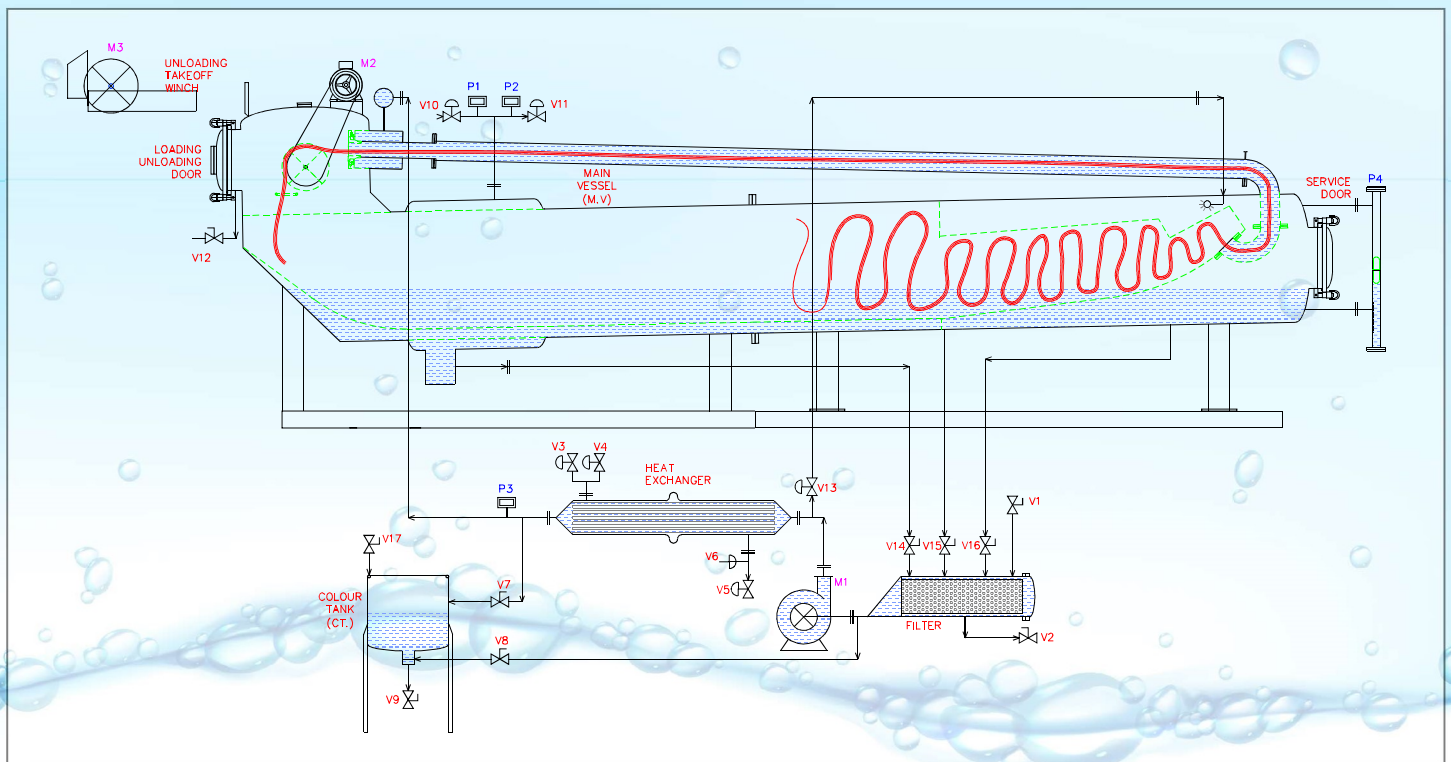

Exclusive Feature:

- Lowest liquor ratio 1:4 to 1:6 (wet fabric)
- Lowest running cost per kgs. of fabric.
- High quality fabric dyeing.
- Specially design Soft Nozzles for Smooth and entangle free operation

Optional Feature:

- Single Chamber model also available upto 25 Kg. to 200 Kg. Capacity
- Fully automatic with PLC.
- Flow meter
- Seam Detector
